Firebug
FileZilla

Authorized to
work in the U.S.
(permanent
resident).

[TECH EXPERIENCE]

Grabit Systems, San Francisco (remote) — *Front End Web Developer* (NOV'16-present)

- Delivered interactive app features that helped capture the #1 market position and get the contract with such clients as Access Hollywood, ABC, Sky Sports, NBC New York.
- Injected user-experience design and developed the new player interface which increased customer acquisition up to 30%.
- Reduced developing process time of the blog web page from 5 days to 2 days by converting Photoshop mockups into clean HTML, CSS, JavaScript, jQuery.
- Provided Senior Software Engineer with 4 mockups (with different layouts) for the developing console that led to an increased efficiency of the developing process by 2 times.
- Improved core website functionality by fixing broken links and scripting errors, which lowered page abandonment rate by 35%.
- Implemented 100% of CSS media queries for mobile responsiveness that created a better user flow.
- Fixed bugs (30+) and tested front-end code to ensure cross-browser compatibility.

Technologies: HTML, CSS, Javascript, jQuery, Jade, Adobe Photoshop.

General Assembly, San Francisco — *Web Development Student* (JUN'16-SEPT'16)

- Successfully completed a 12-week immersive program (60+hours/week), focused on MEAN Stack, Ruby on Rails and Computer Science basics.
- Managed development of app from wireframing to deploying on Heroku with a team of 4 developers. Served as a team coordinator, assigned tasks and analyzed developing process.
- Delivered DRY best-in-class HTML, CSS, JavaScript, jQuery and Ruby on Rails code.

[PROJECTS]

Where To Repair [GitHub](#) || [Heroku](#)

App allows users to find the best car repair shops to get the best price in 1 easy step.

Technologies: Ruby on Rails, PostgreSQL, Materialize.

General Assemblage [GitHub](#) || [Heroku](#)

This is a social networking tool that connects General Assembly alumni across all immersive courses and all locations to foster collaboration.

Technologies: Ruby on Rails, PostgreSQL, Materialize.

Art of Playa [GitHub](#) || [Heroku](#)

This app allows people to share posts about amazing art installations from “Burning Man” festival, that takes place at Black Rock Desert in Nevada.

Technologies: Built full CRUD SPA app, refactored it to a MEAN stack app (by adding Angular.js).

Train or Gain [GitHub](#) || [Heroku](#)

App helps people track calories throughout the day and calculate how much they need to workout to burn this calories.

Technologies: Javascript, MongoDB, Express, Node, Handlebars, Bootstrap.
