[TECH EXPERIENCE]

General Assembly, San Francisco - Web Development Student (JUN'16-SEPT'16)

- Successfully completed a 12-week immersive program (50+ hours/week), focused on MEAN Stack, Ruby on Rails and Computer Science basics
- Managed development of apps from wireframing to deploying on Heroku
- Served as a lead, determined duties of team members, analyzed their performance, motivated them to do even better
- Build full stack apps in 1 week sprint with a team of 4 developers
- Maintained clean code and responsive mobile design

[PROJECTS]

<Where To Repair> [GitHub](#) || [Heroku](#)

Technologies: Ruby on Rails, PostgreSQL, Materialize. Built full stack app.

- App allows users to get a quote for car repair in 1 easy step then be connected to the shops to get the best price.

<General Assemblage> [GitHub](#) || [Heroku](#)

Technologies: Ruby on Rails, PostgreSQL, Materialize. Group project.

Responsibilities: Wireframes, ERD, Front end (Styling, Forms, Flash messages).

- This is a social networking tool that connects General Assembly alumni across all immersive courses and all locations to foster collaboration.

<Vagabond> [GitHub](#) || [Heroku](#)

Technologies: Ruby on Rails, PostgreSQL, Bootstrap. Group project.

Responsibilities: Wireframes, ERD, Back end (Models, Views, Controllers).

- App allows travelers to share stories from different vacation destinations.

<Art of Playa> [GitHub](#) || [Heroku](#)

Technologies: Javascript, MongoDB, Express.js, Angular.js, Node.js, Bootstrap. Built full CRUD SPA app, refactored it to make a MEAN stack app (by adding Angular).

- This app allows people to share posts about amazing art installations from "Burning Man" festival, that takes place at Black Rock Desert in Nevada.

<Train or Gain> [GitHub](#) || [Heroku](#)

Technologies: Javascript, MongoDB, Express, Node, Handlebars, Bootstrap. Full stack app.

- App is created in order to help people track calories throughout the day and calculate how much they need to workout to burn this calories.

<Wonder Women> [GitHub](#) || [Heroku](#)

Technologies: Javascript, jQuery, JSON, API, AJAX, Handlebars, Bootstrap. Full stack app.

- Build gym workouts API, consumed it using AJAX and rendered results to the page using jQuery. Used RESTful Routes and CRUD-able resources. The app is a 8 weeks gym workout plan for woman.

[OTHER EXPERIENCE]

Levy, Erlanger & Co, San Francisco - Accounting Intern (DEC'15-APR'16)

- Implemented new effective system of filing trial balance and tax forms that reduced time for its preparation by 70%
- Acted as a mentor for other interns, handled time sensitive projects by delegating responsibilities to the team members

Zara, San Francisco - Sales associate (OCT'14-AUG'15)

- Enhanced sales by 35% by managing working with other teams to apply essential sales tactics and tailor product demonstrations for each customer

Event agency Polaris, Russia - Junior Project Manager (AUG'12-JUN'14)

- Managed and coached promotional team of 100+ associates
- Planned, supervised and executed multiple social and corporate events from 50-1000 guests, meeting important deadlines
