FileZilla

Authorized to work in the U.S. (permanent resident).

[TECH EXPERIENCE]

Grabit Systems, San Francisco (remote) — *Front End Web Developer* (NOV'16-present)
-Delivered interactive app features that helped capture the #1 market position and get the contract with such clients as Access Hollywood, ABC, Sky Sports, NBC New York.
-Injected user-experience design and developed the new player interface which increased customer acquisition up to 30%.
-Reduced developing process time of the blog web page from 5 days to 2 days by converting Photoshop mockups into clean HTML, CSS, JavaScript, jQuery.
-Provided Senior Software Engineer with 4 mockups (with different layouts) for the developing console that led to an increased efficiency of the developing process by 2 times.
-Improved core website functionality by fixing broken links and scripting errors, which lowered page abandonment rate by 35%.
-Implemented 100% of CSS media queries for mobile responsiveness that created a better user flow.
-Fixed bugs (30+) and tested front-end code to ensure cross-browser compatibility.
Technologies: HTML, CSS, Javascript, jQuery, Jade, Adobe Photoshop.

General Assembly, San Francisco — *Web Development Student* (JUN'16-SEPT'16)
-Successfully completed a 12-week immersive program (60+hours/week), focused on MEAN Stack, Ruby on Rails and Computer Science basics.
-Managed development of app from wireframing to deploying on Heroku with a team of 4 developers. Served as a team coordinator, assigned tasks and analyzed developing process.
-Delivered DRY best-in-class HTML, CSS, JavaScript, jQuery and Ruby on Rails code.

[PROJECTS]

Where To Repair GitHub || Heroku
App allows users to find the best car repair shops to get the best price in 1 easy step.
Technologies: Ruby on Rails, PostgreSQL, Materialize.

General Assembláge GitHub || Heroku
This is a social networking tool that connects General Assembly alumni across all immersive courses and all locations to foster collaboration.
Technologies: Ruby on Rails, PostgreSQL, Materialize.

Art of Playa GitHub || Heroku
This app allows people to share posts about amazing art installations from "Burning Man" festival.
Technologies: Javascript, MongoDB, Express, Node, Angular, Bootstrap.

Train or Gain GitHub || Heroku
App helps people track calories throughout the day and calculate how much they need to workout to burn this calories.
Technologies: Javascript, MongoDB, Express, Node, Handlebars, Bootstrap.
